MEMORANDUM

SUBJECT: Record of Decision OU3  
Cornhusker Army Ammunition Plant, Grand Island, Nebraska

FROM: Gene Gunn, Chief *Gunn*  
Federal Facilities/Special Emphasis Branch

THRU: Michael J. Sanderson, Director *M. Sanderson*  
Superfund Division

TO: Dennis Grams  
Regional Administrator

Attached is the Record of Decision (ROD) for Operable Unit (OU) 3 of the Cornhusker Army Ammunition Plant (CAAP) in Grand Island, Nebraska.. The state of Nebraska has verbally concurred with the ROD.

OU3 comprises the Nitrate Area, Pistol Range, Sanitary Landfill, and Shop Area. The clean-up levels for OU3 were developed based on protection of industrial workers. The following preferred remedies for each area of concern provide protection to humans under nonresidential conditions.

Nitrate Area: Off-site disposal of lead-contaminated soil, and deed restriction to prevent residential use.

Pistol Range: Excavation, off-site disposal of Royal Demolition Explosive (RDX)-contaminated soil and deed restrictions to prevent residential use.

Sanitary landfill: Excavation, off-site disposal of RDX-contaminated soil, and deed restriction to prevent residential use.

Shop Areas: Excavation, off-site disposal of lead-contaminated soil, and deed restriction to prevent residential use. Long-term monitoring for natural attenuation of chlorinated organic compounds in groundwater.

Regional Counsel has reviewed the ROD, and their comments have been incorporated into the document.

Attached is the original signature page for the ROD.

The decision document represents the preferred remedy for the site, and I recommend your approval of the enclosed ROD.
