RE: Cornhusker Army Ammunition Plant OU1
Contract No.: W9128F-18-D-0020
May 2019 through July 2019 Analytical Results Summary

Dear Mr. Simpleman:

Attached are summary tables (Attachment 1) of the quarterly sampling analytical results for the period of May 2019 through July 2019 for the Groundwater Treatment Facility (GWTF) at Operable Unit (OU) 1, located in Grand Island, Nebraska. Samples were collected from the total effluent (SP-E1), total influent (SP-S2), granulated activated carbon (GAC) vessels (SP-S6 and SP-S8), and Extraction Well (EW) #7 monitoring points. The sampling was conducted to meet the requirements of the National Pollution Discharge Elimination System (NPDES) Permit, Permit Number NE0131725, and operations and maintenance procedures for the GWTF.

Brice Engineering collected samples for this quarterly sampling event on July 31, 2019. The results verify concentrations for all specified NPDES monitoring parameters are below the NPDES discharge standards and the GWTF is sufficiently treating contaminants of concern prior to discharge. The sampling conducted for this quarter reflect the latest NPDES requirements. We have included a copy of the Daily Chemical Quality Control Report (DCQCR) (Attachment 2) and the NPDES Discharge Monitoring Report (DMR) (Attachment 3) for the period May 2019 through July 2019 for your review.

Also included are summary tables with historical sampling summary table showing data from January 2015 through July 2019 (Attachment 4), and three charts illustrating the historical analytical results from samples collected from EW #7 (Attachment 5).

Please sign the original NPDES forms attached and transmit to Nebraska Department of Environment and Energy.

If you have any questions, please feel free to contact myself or Corey Schwabenlander, Project Manager.

Sincerely,

Gary Carson
Operation Manager - CHAAP Groundwater Treatment Facility

pH (method 9040C)					
	(s.u.)	NN	6.5 - 9.0	7.4	

Notes:

Anticipated = The anticipated value was established when the Groundwater Treatment Facility (GWTF) went in to operation.

NPDES Permit = Permitted concentration on NPDES permit.

Report = Indicates concentrations are reported on NPDES Discharge Monitoring Report (DMR).

HMX = octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine

RDX = hexahydro-1,3,5-trinitro-1,3,5-triazine

TNT = 2,4,6-trinitrotoluene

TNT = 2,4,6-trinitrotoluene

VOCs = Volatile organic compounds

Combined explosives for the effluent sample at SP-E1 are reported in the NPDES permit and are calculated as (TNT+RDX+Tetryl)

ND = Not Detected (values in parenthesis represent limits of detection (LOD)).

J = Result is less than the RL but greater than or equal to the limits of detection (LOD) and the concentration is an approximate value.

M = Manual Integrated compound.

NN = Not Noted

QC = Quality Control Sample

(µg/L) = micrograms per liter

(s.u.) = standard units

Sample ID: SP = Sampling Port, E=Effluent, n=port number

SP-E1 = Bottom of Effluent Tank

**SP-S2 [TOTAL INFLUENT]
CHAAP QUARTERLY SAMPLING RESULTS SUMMARY (July 2019)**

QC

SAMPLE LOCATION SAMPLE DATE	Units	Max Expected	SP-S2 7/31/2019	SP-S22 7/31/2019
Explosives (method 8330A)				
HMX	(µg/L)	50	ND(0.20)	ND(0.20)
RDX	(µg/L)	100	JM 0.45	M 0.53
Tetryl	(µg/L)	NN	20	ND(0.10)
TNT	(µg/L)	250	5.7	ND(0.40)
VOCs (method 8260B)				
Trichloroethylene	(µg/L)	NN	ND(0.40)	ND(0.40)

	(mg/L)	NN	ND(3.5)	ND(3.5)
pH (method 9040C)				
	(s.u.)	NN	7.3	7.4

Notes:

Max Expected = The maximum expected values with one extraction well operating;
values established when went Groundwater Treatment Facility (GWTF) went in to operation.

HMX = octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine

RDX = hexahydro-1,3,5-trinitro-1,3,5-triazine

TNT = 2,4,6-trinitrotoluene

VOCs = Volatile organic compounds

TSS = total suspended solids

pH = Field parameter with a holding time of 15 minutes.

ND = Not Detected (values in parenthesis represent limits of detection (LOD)).

NN = Not Noted

J = Result is less than the RL but greater than or equal to the
limits of detection (LOD) and the concentration is an approximate value.

M = Manual Integrated compound.

QC = Quality Control Sample

(µg/L) = micrograms per liter

(s.u.) = standard units

Sample ID: SP = Sampling Port, S=Source, n=port number

SP-S22 is duplicate sample

SP-S2 = Discharge of GAC Feed Tank

**SP-S6 [LEAD GAC VESSEL]

Notes:

Anticipated = The anticipated value was established when the Groundwater Treatment Facility (GWTF) went in to operation.
 Permit = Permitted concentration on NPDES permit.
 Report = Indicates concentrations only need reported on NPDES Discharge Monitoring Report (DMR).
 HMX = octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine
 RDX = hexahydro-1,3,5-trinitro-1,3,5-triazine
 TNT = 2,4,6-trinitrotoluene
 VOCs = volatile organic compounds
 pH = Field parameter with a holding time of 15 minutes.
 Combined explosives for the effluent sample at SP-E1 are reported in the NPDES permit and are calculated as (TNT+RDX+Tetryl)
 Total explosives are calculated for operation evaluations as (TNT+RDX+Tetryl+HMX)
 Blank cell indicates not analyzed
 J = Result is less than the RL but greater than or equal to the limits of detection (LOD) and the concentration is an approximate value.
 J1 = Estimated: The quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
 M = Manual Integrated compound.
 ND = Not Detected (values in parenthesis represent limits of detection (LOD))
 NN = Not Noted
 Q = One or more quality control criteria failed.
 UJ = Estimated Non-detect.
 QC = Quality Control Sample
 (µg/L) = micrograms per liter
 (s.u.) = standard units
 Method 8330A used for explosives.
 Method 8260B used for VOCs.
 Method 6020A for metals since 1/31/2018. Method 7740 used for metals prior to 1/31/2018.
 Method 9040C used for pH since 1/31/2018. Method 150.1 used for pH prior to 1/31/2018.
 Sample ID: SP = Sampling Port, E=Effluent, n=port number

Notes:

Max Expected = The maximum expected values with one extraction well operating; values established when the Groundwater Treatment Facility (GWTF) went in to operation.

HMX = octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine

RDX = hexahydro-1,3,5-trinitro-1,3,5-triazine

TNT = 2,4,6-trinitrotoluene

VOCs = volatile organic compounds

TSS = Total Suspended Solids

pH = Field parameter with a holding time of 15 minutes.

GAC = Granulated Activated Carbon

Blank cell indicates not analyzed

ND = Not Detected (values in parenthesis represent limits of detection (LOD)).

J = Result is less than the RL but greater than or equal to the limits of detection (LOD) and the concentration is an approximate value.

B = Compound was found in the blank and sample.

NN = Not Noted

M = Manual Integrated compound.

Q = One or more quality control criteria failed.

QC = Quality Control Sample

(µg/L) = micrograms per liter

(mg/L) = milligrams per liter

(s.u.) = standard units

Method 8330A used for explosives.

Method 8260B used for VOCs.

Method 2540D used for TSS since 1/31/2018. Method 160.2 used for TSS prior to 1/31/2018.

Method 9040C used for pH since 1/31/2018. Method 150.1 used for pH prior to 1/31/2018.

Sample ID: SP = Sampling Port, S=Source, n=port number

SP-S2 = Discharge of GAC Feed Tank

Notes:

Max Expected = The maximum expected values with one extraction well operating; values established when the Groundwater Treatment Facility (GWTF) went in to operation.

HMX = octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine

RDX = hexahydro-1,3,5-trinitro-1,3,5-triazine

TNT = 2,4,6-trinitrotoluene

Total explosives are calculated for operation evaluations as (TNT+RDX+Tetryl+HMX)

VOCs = volatile organic compounds

ND = Not Detected (values in parenthesis represent limits of detection (LOD)).

J = Result is less than the RL but greater than or equal to the limits of detection (LOD) and the concentration is an approximate value.

B = Compound was found in the blank and sample.

M = Manual Integrated compound.

Q = One or more quality control criteria failed.

NN = Not Noted

N/A = Not Applicable

(µg/L) = micrograms per liter

Method 8330A used for explosives.

Method 8260B used for VOCs.

Sample ID: EW=Extraction Well, n=Well Number

Effective 3/31/2010, EW #7 samples were collected from inside the Groundwater Treatment Facility (GWTF); same as SP-S2.

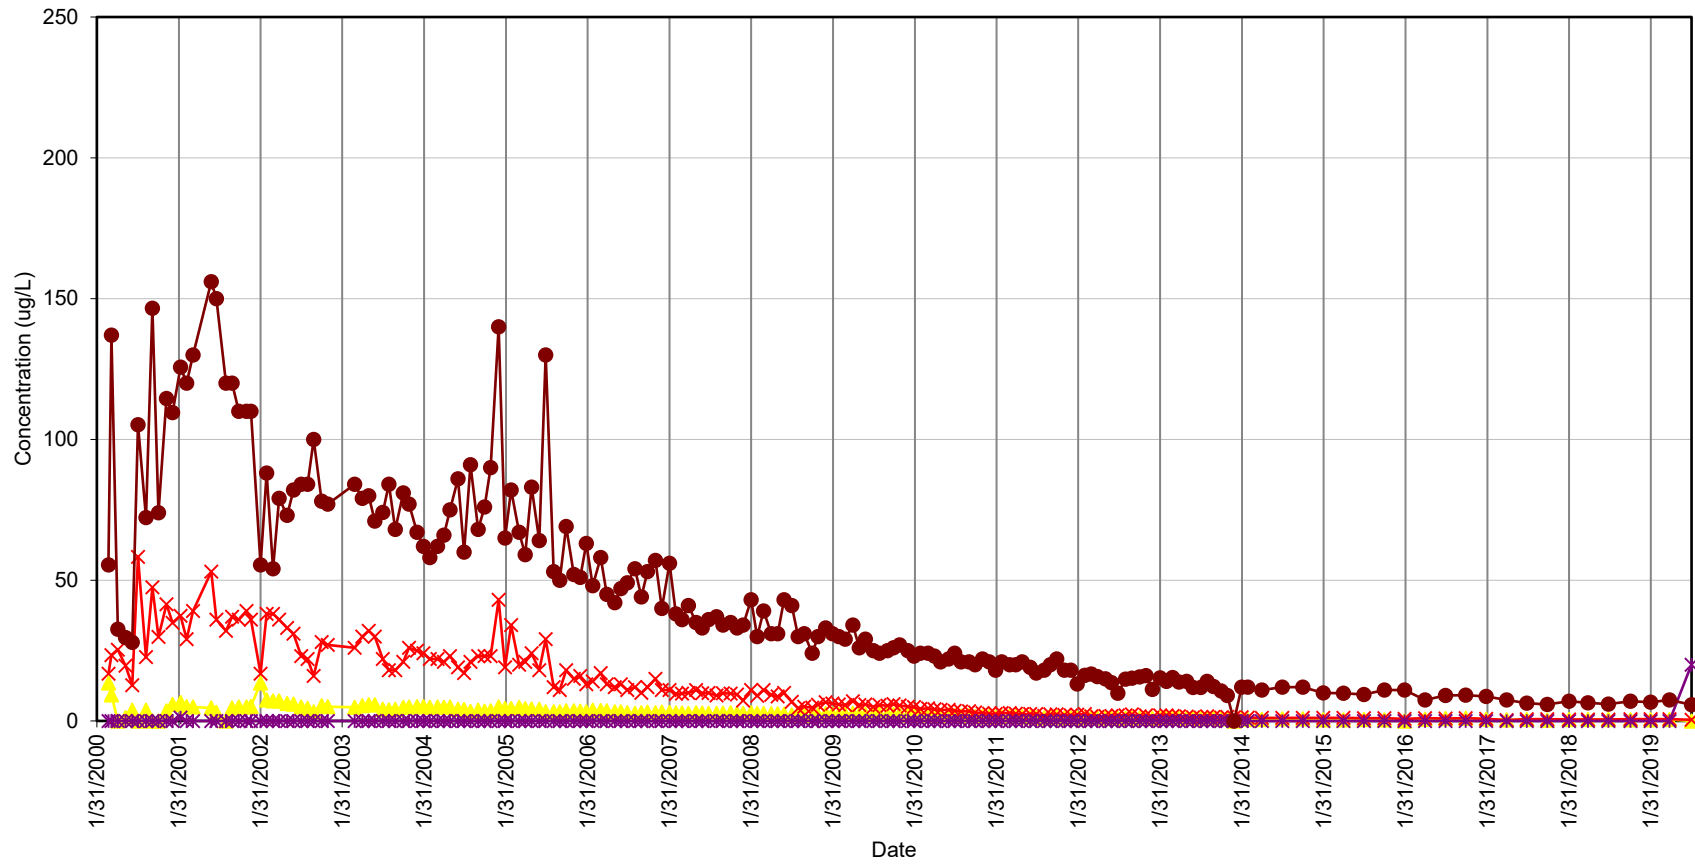

EW #7 only well online.
