

PFAS PA/SI Status

• Preliminary Assessment Completed

- Research focused on documented operational history at each area and any potential relevance to PFAS-containing material
- Personnel interviews conducted
- Two AOPIs identified: Former Fire Station; Former Fire and Guard Headquarters and Fire Training Pit

• Site Inspection In Progress

- Draft Final Quality Assurance Project Plan Addendum under review
- Final QAPP Addendum submittal anticipated by early December 2022
- Field investigations anticipated for mid to late December 2022
 - Includes groundwater and soil sampling at each AOPI

Next Steps: Data Validation and PA/SI Report in 2023
