

Cornhusker Army Ammunition Plant, NE

PFAS Preliminary Assessment Status

• Review of administrative records completed

- Areas researched include:
 - Load Assembly and Pack Facilities
 - **Former** Fire Station and Fire & Guard Headquarters
 - Magazine Areas
 - Burning Ground Area and Pistol Range
 - Landfills and Gravel Pits
- Research focused on documented operation history at each area and any potential relevance to PFAS-containing material

• Interviews conducted with 2 personnel associated with the installation

- Personnel interviewed include:
 - Technical Document Reviewer
 - Wastewater Treatment Plant Operator
- Interviews conducted focused on confirmation of building locations and operational history
- Attempts to interview additional personnel were conducted

Next Steps: **Discussion** of research and findings with Arcadis, USAEC, and USACE to determine if a Site Inspection will be warranted at CHAPP
